

“EU-EECA R&I collaboration in the field of
Information and Communication Technologies”
PROPOSAL IDEA
Baku

12 November 2014

Overview

Raising CG industry of Kazakhstan

Ainur Temirkhankyzy

KCG

Kazakhstan

Related Objective:

Education in areas of Computer Graphics and production of media content.

Short Description:

We provide the following services in the field of CG: Visual Effects (VFX), full production of 3D Animation, Motion Capture services, Development of Augmented and Virtual Reality Applications.

In the partnership with the leading technical state universities our company prepares the Computer Graphics specialists.

Excellence and Impact

- The main advantages of our company are support of the government and tax reduction, which allow us to provide CG services at lower price. Additionally, our facilities and technologies are enough to work on big-scale projects such as full-feature films and animation.
 - We believe that we are able to make a big contribution to the international stream of CG industry by testing and searching the new technologies on practice. We also use media content for sharing ideas and cultural values.
